damage occurs to the Telephone equipment, facilities or to the wiring or equipment, it may not be possible to complete the call until the damage has been repaired.

Place emergency calls only.

After a disaster, especially earthquakes, there is usually a high volume of telephone calls. It is important that you limit your calls to emergencies only. Do not call 911 or the police for confirmation of an earthquake. Listen to your local radio or television station for information.

Out-of-Area Contact:

Select a relative or friend out of the immediate area to act as a clearinghouse for information about your family. Once contact is made, have this person relay messages to the customer's other friends and relatives outside the disaster area.

911 WARM DIAL TONE:

If the customer's line has been disconnected due to non-payment, the line will still have access to 911 service for 120 days from the date of disconnect.

When calling 911, the telephone number and address may be displayed on a dispatcher's viewing screen, even if the customer has Caller ID Blocking. This enables the emergency agency to locate the customer if the call is interrupted. If the customer does not want to have your telephone number and address displayed, call the non-emergency number.

Consult the telephone directory for similar information concerning the use of the telephone in emergency situations.

For Telecommunications Devices for the Deaf (TDD) emergency calls, use the Baudot mode only; dial 911, then tap the space bar until someone answers.

Communications Service Restoration After an Emergency:

In the event of a widespread telecommunications outage caused by a disaster such as severe weather, fire, flood, or earthquake, TDS Telecom restores service as quickly as possible for all customers providing priority to 911 and other public safety service providers, medical facilities, utility companies, and government. Restoration efforts in some cases may be delayed until fire crews or power companies allow TDS Telecom personnel access to the affected area.

800 & 900 TELEPHONE NUMBERS

Think twice before dialing that 800 (888, 855, 866, 877) or 900 telephone number. The customer may end up paying for what you thought was a free call—and your number could be recorded in a database sold to telemarketers!

The CPUC wants consumers to know that some companies I isting 800 or 900 numbers are now using Automatic Number Identification (ANI) which is approved by the Federal Communications Commission. When the customer dials their

number, ANI equipment automatically adds their number to the customer database—and companies are not required to tell the customer if they have ANI.

Companies with ANI can then use the customer's phone number to get your address, income level, items purchased, and similar information from other marketing databases. Or they can sell the customer's number to telemarketers, who may soon be pitching the customer on their products and services. Never assume that an 800 or 900 number is a free call! If the number uses ANI, the customer may reach a recording advising that they will be called back collect. The call could be billed to the customer! If a person answers an 800 or 900 number, the customer can advise them that they do not want their number, name, or address kept in his or her company records. The customer may also want to make it clear that they don't want this information sold to other companies, or the company to solicit future business from you.

To complain about a company using ANI, write:

Office of the Attorney General -

Public Inquiry Unit P.O. Box 944255

Sacramento, CA 94244-2550

or call 1-800-952-5225

www.oag.ca.gov/consumers

PROTECT YOUR CONSUMER RIGHTS

Help protect against unsolicited telephone marketing calls and faxes! As a consumer, the customer has rights to privacy and to protect him or herself from potential telemarketing fraud, unsolicited sales calls and faxes. The laws apply to live calls, prerecorded voice calls and artificial (computerized) voice calls. The Federal Communications Commission (FCC) has adopted rules and regulations, effective December 20, 1992, implementing The Telephone Consumer Protection Act (TCPA). Different rules and regulations apply to calls placed to homes and businesses.

The Federal Trade Commission (FTC) also has telemarketing sales rules, which have been enacted to help protect you as a consumer.

State laws are in place to protect citizens who have had their privacy violated or have been victims of fraudulent telemarketers. The State Attorney General's office, along with the telemarketing sales rules, has the authority to investigate and prosecute fraudulent telemarketers who operate across state lines. State Law AB 2134, effective 1/1/99, requires us to provide customers the following information: Various published information generally describes telephone subscribers' rights under the state and federal law.

This information is available to the customer by contacting the agencies listed below. If the customer has questions or complaints, they may contact the:

California State Attorney General's Office Public Inquiry Unit

Office of the Attorney General

Public Inquiry Unit

PO Box 944255

National Fraud Information Center (NFIC)

This is a private, non-profit organization that operates a consumer hotline to provide services and assistance in filing telemarketing complaints. NFIC forwards appropriate complaints to the Federal Trade Commission for entry into its telemarketing fraud database. 1-800-876-7060 9 a.m. - 5:30 p.m. EST Monday – Friday. Web Address: www.fraud.org

<u>Direct Marketing Association (DMA)/Telephone Preference Service</u>

If the customer suspects that their name is on a direct marketing list and would like it removed, write to:

Telephone Preference Service Direct Marketing Association PO Box 9014

Farmingdale, NY 11735-9014 thedma.org/resources/consumer-resources/

The customer's name can be added to the DMA's list by sending their name, telephone number (include area code), address, and ZIP code. Please remember that with the DMA registration, the number of unsolicited calls to the customer's home should be reduced, but all unwanted calls may not be prevented.

BILLING DISPUTES

If the customer believes there is an error on their bill or has a question about their service, please call TDS Telecom customer support

at 1-888-225-5837. If the customer is not satisfied with the response, they can submit a complaint to the California Public Utilities

Commission (CPUC) by visiting www.cpuc.ca.gov/complaints/. Billing and service complaints are handled by the CPUC's Consumer Affairs Branch (CAB), which can be reached by the following means if they prefer not to submit a complaint online:

Telephone: 1-800-649-7570 (8:30 a.m. to 4:30 p.m., Monday through Friday).

Mail: California Public Utilities Commission, Consumer Affairs Branch, 505 Van Ness Avenue, Room 2003, San Francisco, CA 94102.

If the customer has limitations hearing or speaking, they should dial 711 to reach the California Relay Service. If the customer prefers having calls immediately answered in their mode of communication, they should dial one of the toll-free language-specific numbers below to be routed to the California Relay Service provider.

Type of Call:

TY/VCO/HCO to Voice/English 1-800-735-2929, Spanish 1-800-855-3000. Voice to TTY/VCO/HCO/English

1-800-735-2922, Spanish 1-800-855-3000.

From or to Speech-to-Speech/English & Spanish 1-800-854-7784.

To avoid having service turned off while the customer waits for the outcome of a complaint to the CPUC specifically regarding the accuracy of their bill, they can contact CAB for assistance. If the customer's case meets the eligibility criteria, CAB will provide them with instructions on how to mail a check or money order to be impounded pending resolution of your case. The customer must continue to pay their current charges while their complaint is under review to keep your service turned on.

IMPORTANT PRIVACY INFORMATION
THE CUSTOMER'S NAME AND TELEPHONE NUMBER CAN BE SEEN
BY EVERYONE THEY CALL... UNLESS THEY BLOCK IT!

Any telephone from which the customer places a call will automatically transmit its number to the person they are calling. If the customer places a call from their residence, their name will also be transmitted. If the person they are calling subscribes to the service known as Caller ID, they will be able to see the customer's name and telephone number before they answer their phone. The customer should decide who receives their name and telephone number: the law guarantees you that right. TDS Telecom also believes the customer should be able to choose how they would like to have their phone number blocked—the customer's privacy is paramount. That is why the law requires FREE blocking services that gives the customer the freedom to choose when, how, and if their number will be shown to those they call.

COMPLETE BLOCKING

Complete blocking is a FREE service, which gives the customer

permanent control over the transmission of their name and telephone number. Complete Blocking blocks the transmission of the customer's name and telephone number on the calls they place, unless they specify otherwise. There is no need to enter a code before making each call. Those with Caller ID units who receive the customer's calls will see the word PRIVATE displayed. The customer may deactivate Complete Blocking on specific calls by pressing *82 on their touch-tone telephone before they dial (or by dialing 1182 on a rotary telephone).

SELECTIVE BLOCKING

Selective Blocking is a FREE service, which blocks the customer's name and telephone number from being transmitted and/or seen on Caller ID units on a per call basis. By pressing *67 on their touch-tone phone (or by dialing 1167 on a rotary telephone) before placing a call, the customer's name and telephone number will not be transmitted. Those with Caller ID units who receive the customer's call will see the word PRIVATE displayed. If the customer does not select a blocking option, they will be assigned Selective Blocking. If the customer wishes to change their initial blocking option or the blocking option assigned to their telephone, they may do so free of charge.

IMPORTANT NOTE:

Caller ID blocking may not work on interstate calls. Also, the customer cannot block transmission of their name and telephone number for calls to 911, 800, 855, 888, 866, 877, or 900 services, regardless of the blocking option they choose. If, for some reason, the customer wants to report an emergency without having their name and number displayed, they should call the agency's 7-digit number instead of 911. If the number they're calling from is not equipped with Complete Blocking, they'll need to press *67 before they dial the agency's number to block their name and number from being shown (or by dialing 1167 on a rotary telephone).

If the customer has any questions about their choices or the effect any of these services may have upon their privacy, they may call our business office at the toll-free number below.

ONE-TIME SERVICE CHARGES

Service Orderina:

Central Office Connection Work, per line
VISIT CHARGE One-time charge for visit Regular hours (8am-5pm, Monday-Friday). \$39.65 Overtime \$59.45
LINE EXTENSION & SERVICE CONNECTION Free footage allowance up to 1,000 feet (up to max 300 feet on private property)
MILEAGE ON EACH 1/4 MILE OR FRACTION THEREOF (OFF-PREMISES), EXCEPT MINERSVILLE & TRINITY CENTER One-Party service\$.50
OFF-PREMISES EXTENSION ON NON-CONTINUOUS PROPERTY: PLATINA, OLINDA, AND MINERSVILLE First 1/4 mile or fraction thereof. \$2.00 Each additional 1/4 mile or fraction thereof. \$1.00
OFF-PREMISES EXTENSION ON NON-CONTINUOUS PROPERTY: IRINITY CENTER First 1/4 mile or fraction thereof. \$4.00 Each additional 1/4 mile or fraction thereof. \$2.00
INSIDE WIRE Inside Wire (IW) consists of all wiring and materials on the customer's side of the demarcation point determined by TDS Telecom in accordance with the rules and regulations of the California Public Utilities Commission. The demarcation point is that point where TDS Telecom telephone lines enter your building or home. (Usually the Standard

Network Interface (SNI) or Protector.)

INSIDE WIRE REPAIR

If a Technician is dispatched and trouble is determined to be on customer side of the Network Interface Device (NID), CHARGES WILL APPLY. To avoid unnecessary charges, the customer will be advised to check at the NID.

If customer does not request inside wire work, the appropriate Visit (Travel) Charge applies:

One-time charge for visit (Regular hours 8 a.m. – 5 p.m.,	
Monday – Friday)	.\$39.65*
Overtime	.\$59.45*

If customer does request inside wire work, the above appropriate Visit Charge applies along with the following Labor Charge:

First 15 minutes or fractional thereof	No Ch	narg
Each additional 15 minutes or fractional thereof (plus materia	ls)\$1	5.0

INSIDE WIRE MAINTENANCE PLAN (IWWP)

If the customer subscribes to the Inside Wire Maintenance Plan, in most cases jack and wiring repairs may be performed at no charge. The repair plan is optional and isn't required for basic monthly service. The Inside Wire Maintenance Plan cost is \$1.00 a month for each line.

SPECIAL CONDITIONS—INSIDE WIRE SERVICE

Billable time includes travel, work preparation, actual work, and cleanup. Labor charge begins upon arrival at or on the customer's

Charges for materials may be applicable in addition to labor. The utility provides a 30-day warranty for repairs of simple inside wiring.

If Utility personnel are dispatched to isolate trouble and the customer requests inside wiring maintenance, then the labor charge above will apply in place of the visit charge.

TROUBLE ISOLATION PROCEDURE

If the customer is having problems with the phone and wants to see if the problem is due to the inside wire (IW), the customer should unplug the IW at the Standard Network Interface (SNI) and plug in a phone known to be in working order into the SNI. If the phone does not work at the SNI, the trouble is most likely in TDS Telecom's network. Notify TDS Telecom at 1-800-CALL-TDS (1-800-225-5837) and we will arrange for repair as soon as possible.

If the phone works at the SNI, the trouble is with the IW. The customer can: (1) repair the IW, (2) contact TDS Telecom to make the repair, or (3) pay someone else to repair it. If the customer chooses not to perform the test at the SNI, TDS Telecom can perform the test. However, if the trouble turns out to be with the IW, the customer will be charged for the time spent performing the test at the rates listed above. *Note: Landlords are responsible for installing at least one useable telephone jack and for placing and maintaining the inside telephone wiring in working order.

CALL BEFORE YOU DIG

Call two working days before you dig to allow underground facilities to be located and marked at no charge. Call 1-800-227-2600 or 8-1-1.

Third-Party Charges

If the customer wishes to have charges from third-party providers blocked and no longer included on the telephone bill please contact TDS Telecom. This service is provided free of charge.

WHAT THE CUSTOMER NEEDS TO KNOW ABOUT 911 When there is a situation that threatens human life or property and demands immediate attention, call 911. 911 will reach Fire and Rescue, Police, Sheriff, Highway Patrol, Ambulance, Paramedics, Coast Guard, and/or Search and Rescue services. Do not call 911 for non-emergencies. This causes delays in

911

causes delays in the handling of real emergencies.

NON-I	EMERGENCY	NUMBERS

Igo, Olinda, Platina......(530) 245-6540 Minersville, Trinity Center(530) 623-2611

If you need to place an emergency call:

In the case of a power outage, 911 service may still be available on your wireline phone, even if you do not hear a dial tone.

Make sure that no extension telephones are off-hook.

Stay on the line. You may not hear dial tone immediately. The delay could be as long as a minute or more.

Do not repeatedly depress the switch hook, as this will further delay the call. If the customer receives a "fast busy" or "all circuits are busy" recording, hang up and try again later. If physical
